- Biacore™ services
- Development of critical bioanalytical reagents
- Monoclonal antibody production & purification
- Multi-species animal facilities & polyclonal protocols

Biopharma

- Epitope mapping: conformational & linear
- Species comparison for PK/PD studies: Biacore™ (GE) binding
- Development of bioanalytical reagents: AVA, ADA, NADA & anti-ID
- Host Cell Protein monitoring: ELISA suitability, coverage 2D, bulk production of process-specific antibodies and process-specific ELISA
- Binding affinity & kinetics, Fc receptor binding & active concentration by Biacore™ (GE) for your batch validation

- **Audit & confidentiality agreement**
- **Traceability**
- **Ensuring compliance with regulatory authority requirements**

In vitro diagnostics

- Development of custom antibodies for your diagnostics kits
- Antibody engineering: purification, labelling, fragmentation
- Antibody pair validation by Biacore™ (GE)
- Polyclonal antibody large-scale production and purification
- Monoclonal antibody production on bioreactors: from few milligrams to grams
- Secure cell line storage
- Custom immunoassay development

- **ISO 9001 certification**
- **Inter-lot reproducibility**
- **Lot reservation**
- **French research tax credit (CIR)**

OUR SPECIFICITY, YOUR ANTIBODIES

Biopharmaceuticals, in vitro diagnostics industries and research organizations appreciate Agro-Bio's expertise and know-how in the field of antibody. French company of group Stago, Agro-Bio provides a wide range of services: development, production and characterization of custom antibodies.
